INNOVATORS IN ENTERAL CARE

Global Trust in German Design & Quality

danumed
MEDIZINTECHNIK

danumed Medizintechnik GmbH

Individual solutions are our standard.

We are an owner-managed innovative German medical technology company with the highest quality standards, many years of experience in enteral nutrition and a clear customer orientation.

Our focus is on development, production and distribution of high-quality medical products for enteral nutrition. danumed offers a comprehensive product portfolio in enteral application technology for the safe and comfortable administration of enteral feeds.

All our customers appreciate our personal approach, our reliability and the fact that we always have an open ear for special requests.

Best regards from Regensburg, Germany,

Sonja and Hans Winklmann

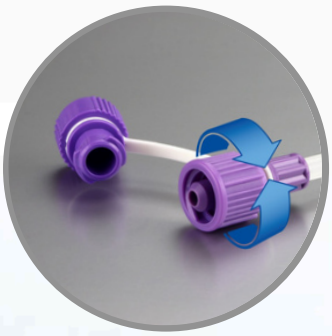

Special product features of our danumed enteral application products:

ENFit®

Patient safety is a top priority for danumed. It is a matter of course that all our enteral products comply with the standards DIN EN ISO 20695 and 80369-3 and are equipped with ENFit® connectors, to avoid misconnections with other systems and to ensure the protection of enteral-fed patients worldwide.

ENSwivel®

danumed permanently improves its enteral products to enhance patient safety and comfort. A recent improvement is the equipment of most of our ENFit® connectors with the innovative rotating ring ENSwivel®, which makes the life of patients and users so much easier.

The ENSwivel® allows for easy connection and disconnection of ENFit® devices, even very tight connections can be released effortlessly. Furthermore, this feature avoids any twisting of the enteral tube, which is both painful for the patient and inconvenient for the user.

The danumed ENSwivel® – an innovative change with a big impact on patient comfort and user handling.

TRITAN™

danumed ENFit® connectors are made of TRITAN™, a light, robust and durable plastic material that is resistant to aggressive solutions and medicines. TRITAN™ ensures an extremely break resistant application and can largely avoid stress cracks.

All our enteral application products are manufactured with high-quality materials and are all latex-free, DEHP-free and BPA-free. The majority of our products is also PVC-free. Silicone and polyurethane are our preferred tube materials.

danuButton®
Compact XS / Premium Set

The danuButton® is a replacement feeding tube for long-term enteral nutrition and use with completely healed stoma. The low-profile feeding tube is easy to conceal under clothing and especially for active, mobile patients.

The extensive accessories of the danuButton® Premium Set enable you to an easy and comfortable replacement of the gastrostomy probe, additional components are no longer necessary. The danuButton® Compact XS offers a streamlined selection of essential accessories and is well accepted in home care settings.

The decision for the danuButton® is the decision for more quality of life through an innovative, high-quality product.

COMFORT

- **Large selection of sizes and lengths** for the individual and perfect fit
- **Well-chosen accessories** ensure easy and convenient button replacement
- **High comfort** due to soft, flexible silicone
- **Low-profile design** for more mobility and quality of life
- **Easy cleaning** and maintenance
- **Tilted** balloon valve

SAFETY

- Made of **high-quality medical grade silicone** with high clarity
- All sets are **latex-free, PVC-free, DEHP-free, BPA-free**
- **Radiopaque stripe** along the entire shaft
- **Apple-shaped inner retention balloon with high balloon stability** for long usage, secure fixation and to avoid leakage
- **Flat, rounded tip** enables atraumatic insertion
- **Recessed tip** to avoid trauma
- Secure **anti-reflux** valve

The danumed® Extension Sets included in the danuButton® Premium Sets are made of kink-resistant, biocompatible polyurethane. They are equipped with ENFit® connectors according to DIN EN ISO 80369-3 and danumed's innovative rotating connector, the ENSwivel®.

danumed® Extension Set for Gastrostomy Button

Extension set for delivery of enteral nutrition, liquid medication and decompression.

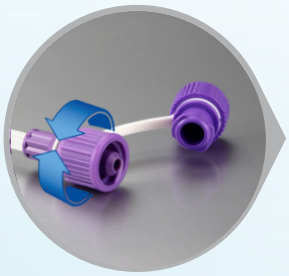

Innovative features ensure good flow and easy handling.

Cost-efficient solution with usage for up to 14 days.

COMFORT

Innovative Rotating Connector ENSwivel

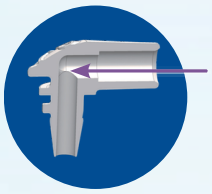

- Allows for the easy connection and release of ENFit connections with a **"Two-Finger-Turn"**. Simple, fast and comfortable.
- Only the rotating Swivel is turned and not the entire connector. This feature **avoids any twisting of the enteral tube** which can be painful for the patient and inconvenient for the user.
- All danumed ENFit® connectors offer the advantages of the ENSwivel®: **ENFit®**, **Y-ENFit®**, **ENFit® Bolus**.

High-End Button Connector

- The design of the locking mechanism ensures **easy, safe and tight connection** to the button.

Rounded kink in the inner lumen for unimpeded flow.

Ergonomic form of the button connector with ribbed profile for good grip.

SAFETY

Maximum safety for the patient

- The ENFit® connector according to DIN EN ISO 80369-3 **avoids tubing misconnections** and enhances patient safety significantly.
- All ENFit® connectors from danumed are made of **TRITAN™**, a plastic material resistant to aggressive solutions/medicines.
- All extension sets with ENFit® connector are **free from latex, PVC, DEHP and BPA**.
- The tube is made of polyurethane – a biocompatible and kink-resistant material that allows duration of use for **up to 14 days**.

danumed® GastroTube

ENSwivel

90° danuPlate

danuClip*

Gastrostomy feeding tube with retention balloon for long-term enteral nutrition

For superior patient comfort and ease of use:

- ***Innovative rotating ring ENSwivel®****, for easy connection and release of ENFit® connections, without twisting the tubes. Secure, tight connection with just a "**Two-Finger-Turn**". Simple, fast, comfortable.*
- ***90° danuPlate** – soft external retention plate with 90° angulation for secure and discreet fixation.*
- ***danuClip** – tube clamp, prevents reflux of nutrition / stomach contents*.*

**Available as a separate product, please see REF on back page.*

COMFORT

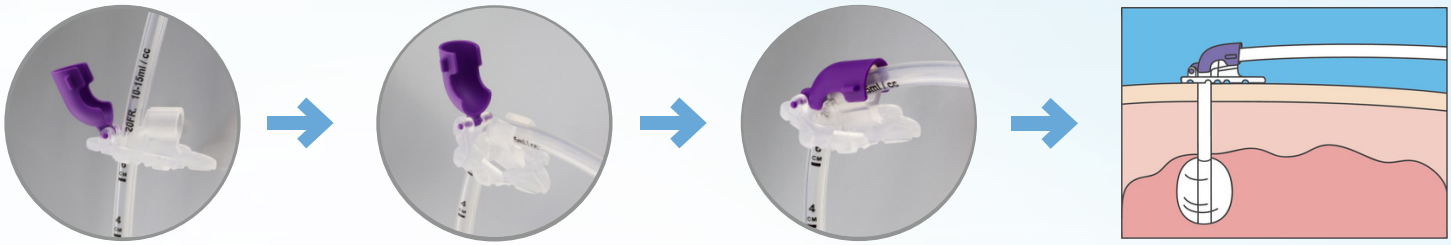

- **Excellent patient comfort** due to soft, flexible silicone
- **Rotating ring ENSwivel®** on all ENFit® connectors
- **90° danuPlate** – structured design allows for air circulation in the stoma site area
- **danuClip** – practical, simple and quick to use*
- **Extensive selection of sizes** from 12 Fr to 24 Fr for the individual and perfect fit
- Balloon fill valve with Luer connector, with **colour coding** according to Fr size
- **Length marking** in cm along the tube
- **Display of the balloon volume** on the shaft
- **Convenient accessories** with every GastroTube: a pack of **lubricant** for easy insertion and a **danumed® balloon syringe 10 ml** to inflate the retention balloon

SAFETY

- Gastric replacement feeding tube made of **high-quality medical grade silicone**
- **Free of Latex, PVC, DEHP and BPA**
- **Flat rounded tip** to reduce trauma risk
- **Inner retention balloon with high balloon stability** for long usage, secure fixation and to avoid leakage
- **ENFit®** connectors according to DIN EN ISO 80369-3 to prevent tubing misconnections with other systems
- Available with **ENFit® and Y-ENFit®** connectors
- **Radiopaque stripe** along the shaft

Easy handling and secure, discreet fixation of the GastroTube with the 90° danuPlate:

danumed GastroTubes with ENFit® and Y-ENFit®

Supplied in a set with lubricant and danumed® balloon syringe 10 ml.

danumed® StomaMeter

Stoma Measuring Device with retention balloon

The StomaMeter is a measuring instrument for determining the stoma length. The length of the stoma tract is measured simply, accurately and reliably to ensure the perfect selection of the optimal gastrostomy button.

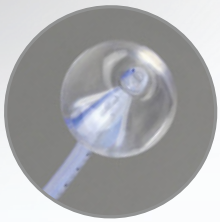

Accurate determination of the length of the enteral stoma improves the fit of the gastrostomy button and thus patient safety and comfort.

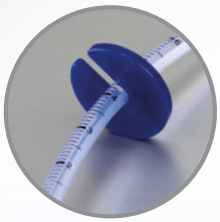

COMFORT

- **Soft, flexible material** provides patient comfort
- **Flat retention plate** simplifies reading of measured values
- **Imprint of the balloon volume** on the funnel
- **Convenient accessories** in every single package: A pack of **lubricant** for easy insertion and a **danumed balloon syringe 10 ml** to inflate the retention balloon.
- Available in **size 12 Fr**, suitable for each stoma

SAFETY

- Made of high-quality **medical grade silicone**
- **Latex-free, PVC-free, DEHP-free** and **BPA-free** material
- **Flat rounded tip** to avoid trauma
- **Radiopaque stripe** along the shaft
- **Precisely legible** and wipe-resistant scaling

danumed® StomaMeter

danumed MEDIZINTECHNIK

danumed® Stopcock

Three-way stopcock with ENFit® and ENSwivel® for enteral application systems

Patient safety and user comfort are top priorities for danumed. All of our enteral nutrition systems are equipped with ENFit® connectors in accordance with DIN EN ISO 80369-3 in order to reduce the risk of unintentional faulty connections with other systems.

***danumed® Stopcock** is an ENFit® three-way stopcock for the separate administration of enteral nutrition and medication. The male ENFit® connectors are equipped with the innovative rotating ring ENSwivel® for better patient comfort and easy handling.*

Lightweight design for comfortable use.

COMFORT

ENSwivel®

- Twisting of the enteral tubes is avoided since not the whole connector is turned, but only the ENSwivel®
- Secure, tight connection with just a "Two-Finger-Turn". Simple, fast, comfortable.

ENSwivel

Larger flow hole

- For consistent flow rate of enteral feeds, liquids and medication
- Opening in the form of a rounded bottom slot for unimpeded flow

The danumed® Stopcock is
• Latex-free • PVC-free • DEHP-free • BPA-free

SAFETY

ENFit®

- A female ENFit® connector for connection to a feeding tube
- Two male ENFit® connectors with ENSwivel® to expand connection options

TRITAN™

- The base unit of the danumed® Stopcock is made of TRITAN™ – a light, robust and durable plastic that is resistant to aggressive solutions and medication
- Stress cracks are largely avoided, the danumed® Stopcock is extremely break-resistant in the application

danumed® Stopcock

REF	Product description	Piece/sales unit
DA 1051 7022	danumed® Stopcock	20 pieces

Each danumed® Stopcock is separately sterile-packed.
20 pieces in each box, 800 pieces in each shipping box.

MEDIZINTECHNIK

More Mobility in Daily Life with a Feeding Tube – thanks to the FreeArm!

The FreeArm is a clever, practical solution for **safer and easier** tube feeding - at the hospital, home and on-the-go.

Especially for parents and caregivers of children who depend on tube feeding, daily care often means managing **many tasks at the same time.**

This is where the FreeArm provides support: It **reliably and securely** holds syringes, feeding bags, or pump systems in place, offering a **valuable 'third hand'.**

The strong, flexible holding arm significantly **relieves caregivers and relatives** in everyday life. As a result, more time and space remain for personal attention, loving care, and mobility - leading to **improved quality of life and reduced stress.**

The FreeArm gives back freedom and flexibility – making each day with tube feeding easier and closer to normal.

danumed Medizintechnik GmbH • Stadtamhof 18 • 93059 Regensburg • Germany
Tel + 49 (0) 941/ 890 588-80 • info@danumed.com • **www.danumed.com**

Benefits at a Glance:

- **Flexible Positioning:**
  The 50 cm arm is easily adjustable – for maximum comfort and secure hold.
- **Hands-Free Convenience:**
  Keeps your hands free for other care tasks and more personal attention.
- **Versatile Use:**
  Attaches easily to wheelchairs, cribs, tables, or incubators – wherever it's needed.
- **Broad Compatibility:**
  Fits enteral syringes up to 100 ml, feeding bags up to 1200 ml, and feeding pumps up to 1 kg.
- **Easy Setup:**
  Clever clamp and practical holders make it fast and easy to set up and secure.
- **Compact & Portable:**
  Folds down to save space – fits into any bag and is ready to use anywhere.
